Classification Proposed Adopted By Agency Temporary Emergency Permanent

Regulation R189-08: Leaking Underground Storage Tank and Corrective Action Regulation: This regulation revised the Underground Storage Tank regulations and the Corrective Action regulations that address environmental site cleanups. The regulations consolidate cleanup requirements for hazardous substance, hazardous waste, or regulated substance released from underground storage tanks and all other release sources. The regulations also make revisions to site assessment procedures to accommodate all types of releases from minor incidents to large sites with long operational histories of potential releases. The regulations better define abatement actions and they refine soil action levels to include consideration of all potential exposure pathways.
